INOVA X5 LED FLOODLIGHT

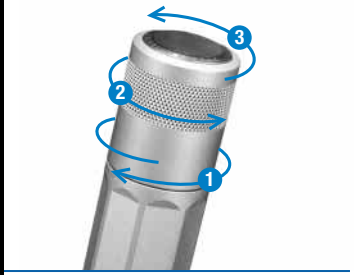
a suberbly engineered tool that delivers unrivaled performance and durability, for a lifetime of owner satisfaction.

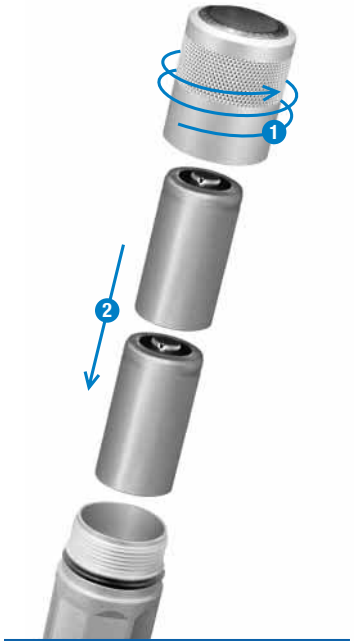
Congratulations on your purchase of the INOVA X5 LED Floodlight. Now you can experience the brilliant power and ruggedness of a police tactical floodlight and a search and rescue quality safety light all in the palm of your hand—anytime, anywhere. Whether it's navigating the most extreme expedition to simply illuminating a campsite, the INOVA X5 LED Floodlight just may be the most rugged, versatile and most useful lighting product you will ever own.

SWITCH OPERATION

The INOVA X5 has a patent pending three-position operating switch cap:

1. To engage the **constant on** mode, the battery cap must be completey screwed (clockwise) into the main body tube (battery compartment).
2. From the constant on position, one-half revolution counter-clockwise turn will engage the **momentary on**. To activate the intermittent mode, depress and hold the rubber button end-cap for as long as light is required.
3. One-half counter-clockwise turn from the momentary on will lock the switch in **constant off** mode, rendering the light inoperable and safe for travel or storage.





BATTERY REPLACEMENT

The INOVA X5 requires two (2) 123A lithium batteries. The red and infared models require one (1) 123A lithium battery.

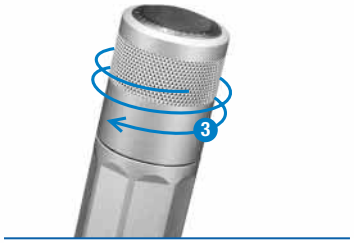
To replace batteries:

1. Remove the switch cap by completely unscrewing it counter-clockwise.
2. Insert the batteries with the positive (+) ends up, toward the switch cap.
3. Replace the switch cap and turn clockwise to secure.

MAINTENANCE

Once every six months clean the threads on the main body tube and inside the switch cap with a dry cloth, and apply a thin coat of silicone grease to the threads and O-ring.

***While the X5 is water resistant, it is not designed to be used as a submersible flashlight (i.e. a diving light).**



LIMITED LIFETIME PRODUCT WARRANTY

Emissive Energy Corp. warrants this light to be free from defects in material and workmanship for the life of the light, except in Germany, where law restricts product warranties to a maximum of ten years. If your light has a manufacturer's defect covered by our warranty, we will repair or replace this light, at our option, without charge when it is returned to an authorized service center or to Emissive Energy Corp.

EXCLUSIONS

This warranty does not extend to any light damaged by alteration, misuse or battery leakage. Battery expiration and battery leakage are excluded from the warranty and are not considered to be defects in the material or workmanship of the light.

Specifically, Emissive Energy Corp. disclaims any responsibility for incidental or consequential damages. Some jurisdictions in the United States, Australia, and Canada do not allow exclusion or limitation of incidental or consequential damages and/or limitations on transferability, therefore the above limitation or exclusion may not apply to you.

In the United States, Australia, and Canada, this warranty gives you specific legal rights; and you may have other rights which vary from province to province, state to state or country to country. This warranty does not affect the statutory rights of purchasers in the European Union, Norway, Switzerland, or Germany with regard to legal warranty claims, nor in France resulting from the legal warranty against hidden defects.

WARRANTY CLAIMS

Send the light along with $5.00 for shipping and handling to:

Emissive Energy Corp., Service Center
135 Circuit Drive,
N. Kingstown, RI 02852 U.S.A.

For your protection and to expedite handling and/or postal claims we recommend that all returns be insured and sent Certified or Registered Mail, Return Receipt Requested. Postage due and freight collect items will not be accepted.

WARNING

CHOKING HAZARD - small parts. Not for children under 3 years old.

Keep lithium batteries out of reach of children. Should a battery be swallowed, immediately contact emergency health provider.

BATTERY INSTALLATION AND DISPOSAL SHOULD BE HANDLED BY ADULT in accordance with battery manufacturer's instructions.

Customers are responsible for use, disposal and compliance with governmental regulations.

PATENTS

Manufactured under United States and international patent numbers, US: 6,709,129; D479,013; D468,851; D473,961; D476,103; D475,798; D468,464; D463,593; D434,164; D455,510; D455,513; UK: 3007640; 2095440; 2099654; DE: 4 00 08 283.7; 4 01 02 139.4.

Other US and international utility and design patents are pending.

Made in USA with US and imported components. The distinctive shapes, styles, packaging, configurations and overall appearances of all INOVA flashlights and lighting products are trademarks of EMISSIVE ENERGY CORP. The unique bulb configurations, body, and barrel shapes inherently identify them as members of the quality family of INOVA brand products.

innovation runs in the family of INOVA lighting instruments

TITANIUM	BLACK	
X5MT-WT	X5MT-WB	Spotlight White
X5MT-GT	X5MT-GB	Brilliant Green
X5MT-RT	X5MT-RB	Night Vision Red
X5MT-BT	X5MT-BB	Cobalt Blue
X5MT-UV		UltraViolet Light

X5 color spectrum

The X5 is available in two body finishes, titanium and black, and the X5 is available in several pure, wavelength-specific colors for different lighting situations. White is best for all-around use. Green offers the highest visibility. Red won't hinder the eyes' night vision. Blue enhances contrast. The first ultra-bright handheld UV solution, the X5 UV model, makes expensive stationary UV lights obsolete.

Brilliant thinking, brilliant floodlight

Individual reflectors surround each of the five LED lamps recessed into the X5's patented stainless steel head. These powerful, shock-proof lamps project light up to 120' and operate from -20˚ to +50˚C. The advanced lithium batteries included with the X5 generate over 20 hours of light and have a shelf life of more than 10 years. The X5 unquestionably lights the way.

INOVA® MICROLIGHT

The Microlight is the smallest, brightest light — anytime, anywhere. Small but mighty, the Microlight is worlds apart from disposable imitators. The advantages span: 33' light projection; one-mile signal visibility; water and crush resistance; extreme environment operation; and up to 15-hour battery life.

The Microlight features momentary on and constant on/off functions. Four available light colors enable you to select the optimum light for your application. A stainless steel lanyard clips to clothing and gear for secure, go-anywhere portability. For power, compactness and versatility, the Microlight is the macro performer in its class.

INOVA XO™ LED FLASHLIGHT

The INOVA XO is the first flashlight to collect, concentrate and deliver +90% of the light generated by high-powered LED lamps. This breakthrough in optical efficiency means a light beam, effective up to 200', that cuts the darkness like no other LED flashlight.

The XO's patent-pending TIROS™ (Total Internal Reflection Optical System) one-piece lens is the technology responsible for its ability to project more light, farther, than any flashlight in its class. High performance is coupled with power regulating circuitry that provides peak, non-dimming brightness over the long life of each lithium battery set. Uncompromisingly rugged and reliable with best size-for-size light delivery, the police-quality XO is an efficient, compact tool that makes bulkier and less efficient flashlights obsolete.

INOVA X1® LED SPOTLIGHT

Like the X5, the X1 is a synthesis of design vision, stringent engineering standards and world-class LED technology, but in a sleek barrel shape just 3.9" long by .72" in diameter. This compact tool fits easily in pockets, briefcases, toolboxes and the like, so you can always have light at hand.

As for power, the X1 projects a perfect light circle up to 65' and offers 1-mile signal visibility. Intelligent power regulation means you get constant, full-power light emission for up to 10 hours per AA alkaline battery. Its stainless steel head, aircraft aluminum hard-coat anodized body and quality components make the X1 a trusted companion in extreme environments.

INOVA 24/7® LED SMARTBRIGHT™

It's eight lights in one, a command center of 3 steady lights, 4 signal-pattern lights, and finder mode. Now, selecting and positioning the right light for the situation is just a turn of the dial. Engineered and built the INOVA way, the 24/7 projects light up to 75', offers two-mile signal visibility and operates up to 15,000 hours in finder mode.

The compression-sealed polycarbonate/ABS body, featuring a recessed lamp design, shrugs off impact, water, heat and cold. Accessories further enhance the broadband versatility. You can wear or mount the 24/7 with the included stainless steel clip and neck strap plus optional magnetic mount, headband and wall mount. The 24/7 also stands upright or on its side.
